

ทิศทางประเทศไทยภายใต้แผนพัฒนาดิจิทัล
เพื่อเศรษฐกิจและสังคม

พันธ์ศักดิ์ ศิริรัชตพงษ์

๒๑ กรกฎาคม ๒๕๕๙

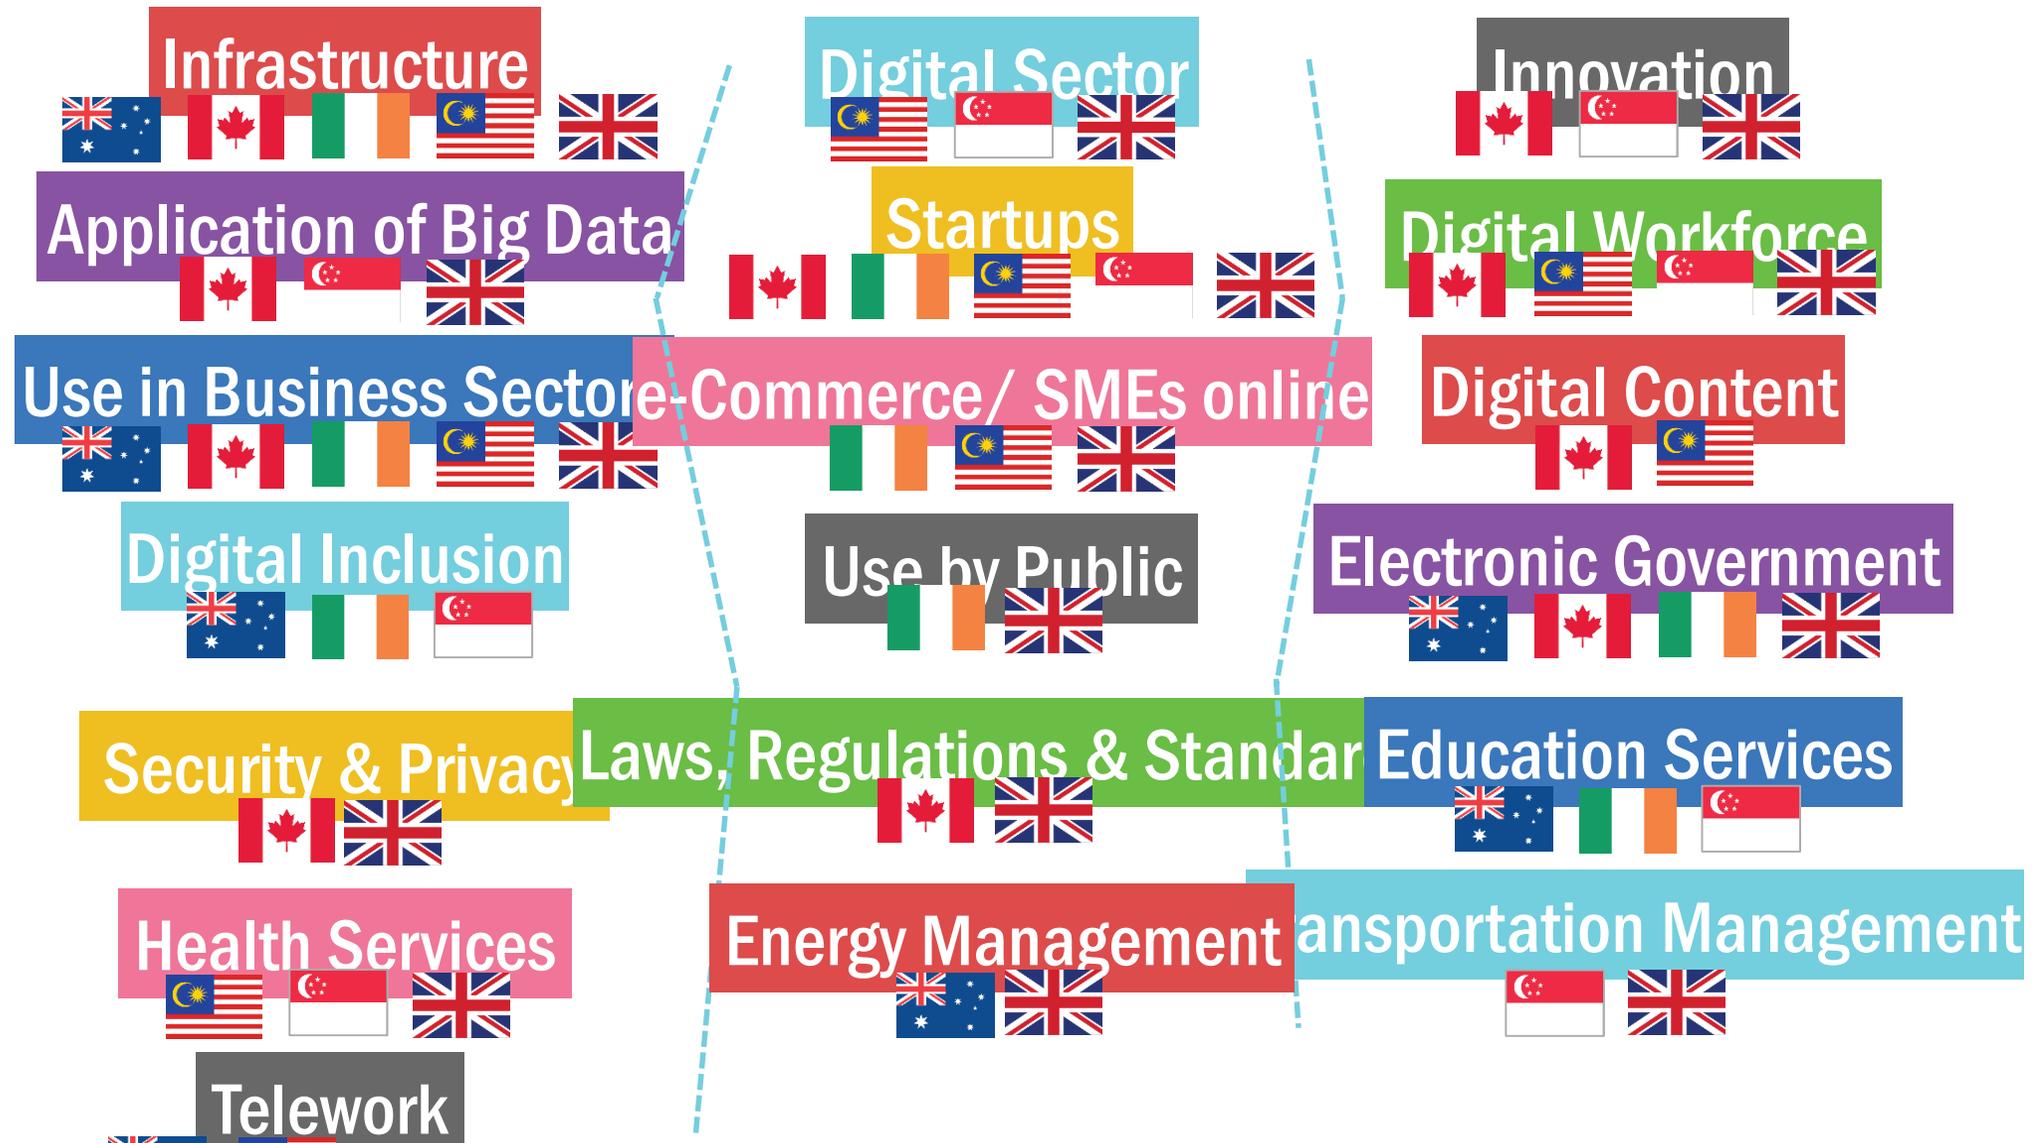

Definition “Digital”

- Analog VS Digital(analog<>discrete)
- ดิจิทัล หมายความว่า เทคโนโลยีที่ใช้วิธีการนำสัญลักษณ์ศูนย์และหนึ่งหรือสัญลักษณ์อื่นมาแทนค่าสิ่งทั้งปวงเพื่อใช้สร้างหรือทำให้เกิดระบบเพื่อให้มนุษย์ใช้ประโยชน์(ร่างที่เสนอสนช.)
- ดิจิทัลหมายความว่าเทคโนโลยีที่เกิดจากการทำงานร่วมกับหรือโดยคอมพิวเตอร์เพื่อสร้างหรือก่อให้เกิดระบบต่างๆที่เป็นประโยชน์(ร่างที่แก้ไขโดยคณะกรรมการธิการสามัญ)
- ดิจิทัล เป็นคำคุณศัพท์(**adjective**) หรือคำนาม(**noun**)(ดิจิทัลเพื่อเศรษฐกิจและสังคม หรือ เศรษฐกิจและสังคมดิจิทัล)

Digital Economy and Challenges

- Connectivity
 - Requirement for high quality digital infrastructure for massive use. Meanwhile, increasing network density is costly, time-consuming. Alternative solutions are needed.
 - What are the roles of government? What responsibility do governments have for providing connectivity?
- Inclusiveness
 - Need to ensure that everyone or every business including SMEs can reap the benefits of digital technology.
- Trust and Digital Risk Management
 - Security and privacy concern in the digital environment where commonly found are connected devices that continuously collect personal information.
- Digital technology = Disruption
 - Traditional business are disrupted by digital platform such as the case of Uber, ABNB.
 - New rules and regulations needed.
- Skills implications
 - Increasing use of digital technologies is raising the demand for new skills. How do we prepare our citizen, our workforce?

National Digital Economy Strategy

Australia

Australia's goal is that by 2020, it will stand among the world's leading digital economies. It focuses heavily on online participation/ engagement by all sectors households, businesses, and non-profit organizations., Health/ aged care, education, teleworking, online government, and digital inclusion are all keywords in Australia's National Digital Economy Strategy.

Canada

Canada aims to become a Thriving Digital Canada by 2017, with 5 strategies, from (1) connecting people with high-speed Internet, (2) protecting people from online threats and abuse, (3) providing economic opportunities in with digital technology (business of all sizes adopting technology), (4) building a digital government, and promoting Canadian content and creative industries.

Doing more with Digital
National Digital Strategy for Ireland

Ireland

Ireland's slogan for its National Digital Strategy for Ireland is "Doing more with digital." The three main strands are (1) to move Irish businesses online, (2) to boost citizen engagement (halving the number of non-liners by 2016), (3) to use ICT to its full potential for education & e-learning. Other cross cutting measures include National Broadband plan, National Payments Plan and e-Government Strategy.

Case countries at a glance

Malaysia

Malaysia is to use digital technology to complementing Malaysia's Vision 2020 -- becoming a high-income nation. Digital Malaysia 345 Strategic Roadmap is quite broad in scope from (1) increasing access, adoption, and use, to (2) promoting sub-sectors including ICT Services, eCommerce, ICT Manufacturing, ICT Trade, Content & Media, to (3) nurturing 3 target communities namely digital entrepreneurs, bottom 40% of the population, digital-savvy youth, and SMEs.

Singapore

Singapore is aggressively moving towards becoming the world's first smart nation. Its Infocomm Media 2025 focuses on 3 strategic thrusts – (1) to capitalize on data and advanced digital technology so the country will become even more economically competitive, (2) to nurture digital ecosystem conducive to risk taking and experimentation with the goal of creating Singapore made content, products, and services, and (3) to connect people with digital technology to better quality of life in the areas of health, education, transportation, digital inclusion.

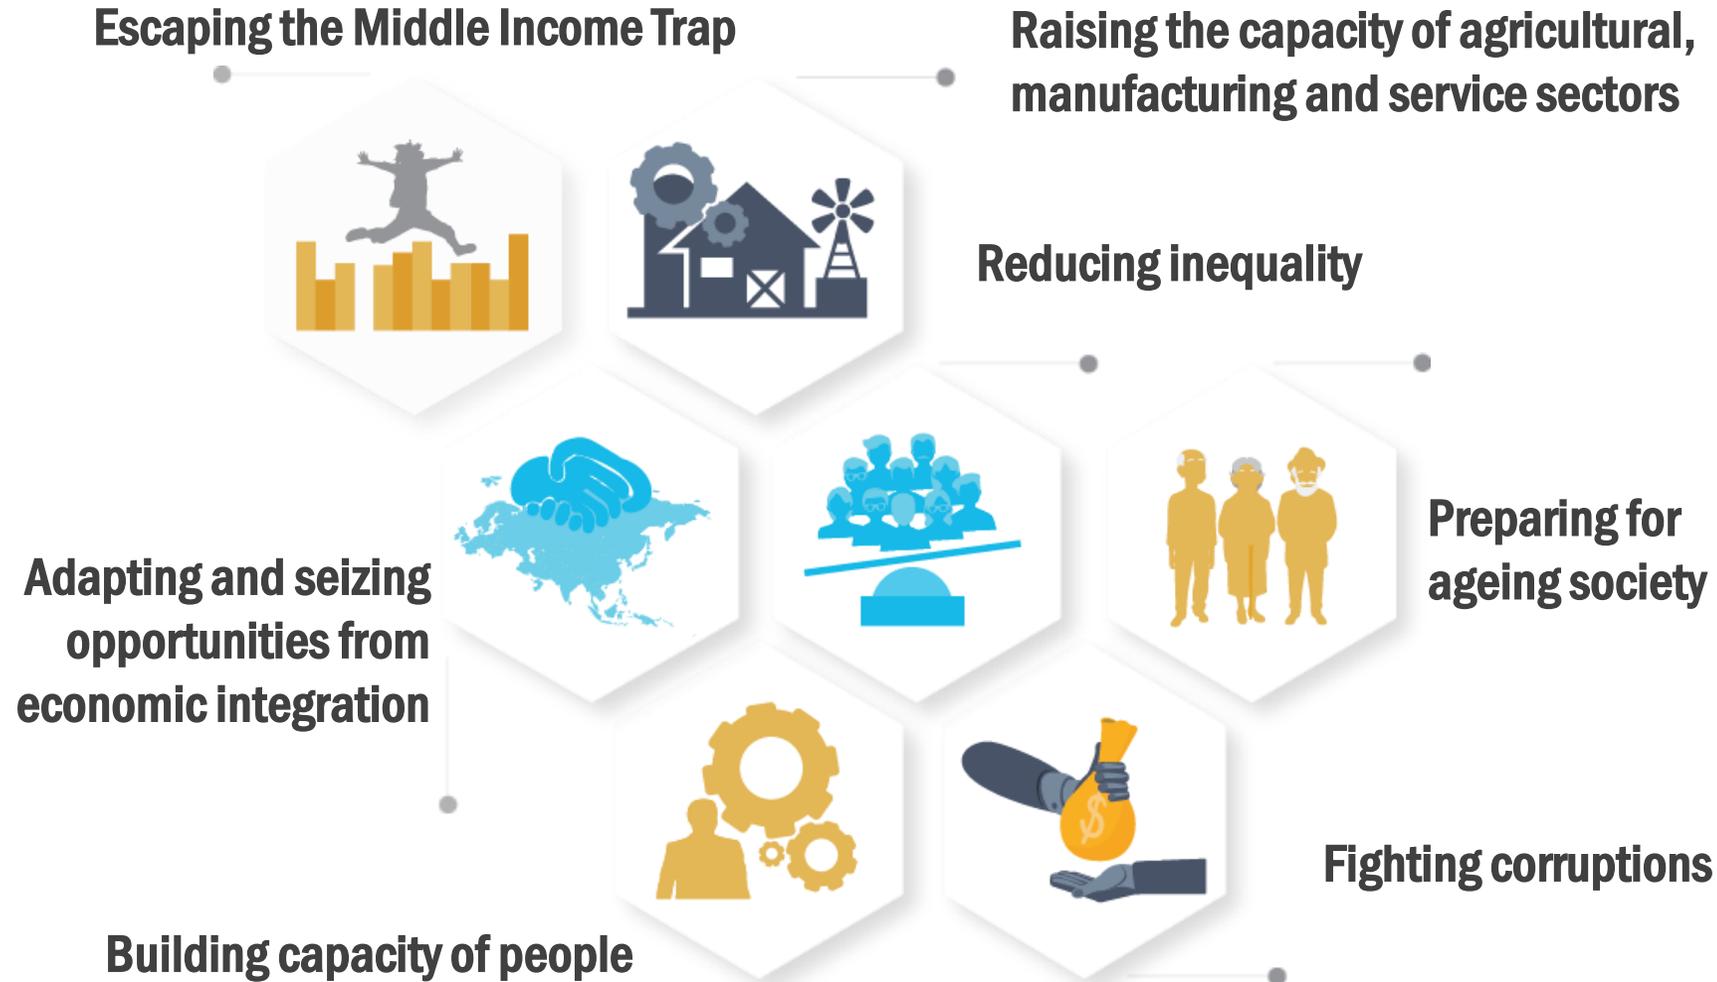

United Kingdom

UK's goal is to become a thriving UK information economy, enhancing national competitiveness. It has four action areas: (1) to build a strong innovation digital sector and export UK products and services to the world, (2) to promote smart use of data and digital technology in all UK businesses, (3) to ensure citizens benefits in such areas as digital literacy, public digital services, and smart cities and (4) to underpin the UK's information economy with digital workforce, broadband infrastructure, and cyber security/ privacy.

Challenges in Thai Context

VISION

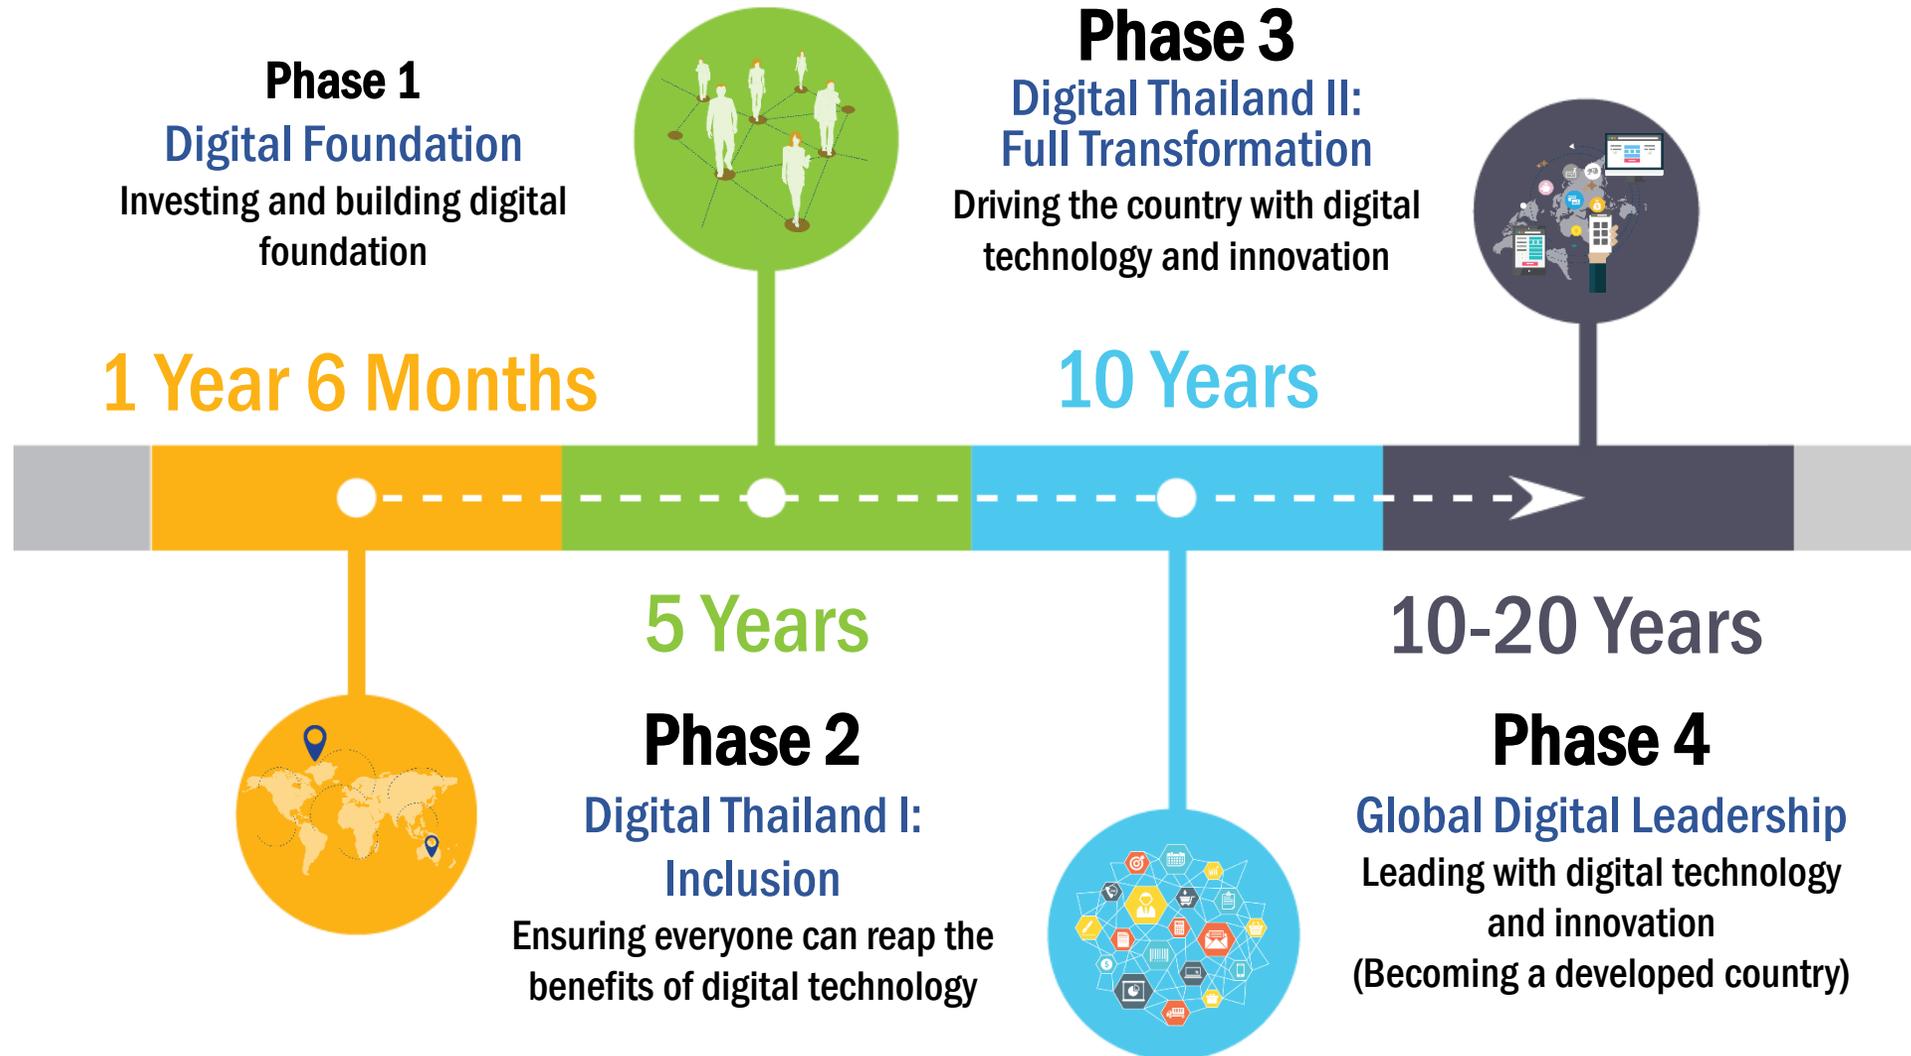

Transform towards Digital Thailand

Digital Thailand

is defined as a transformed Thailand that maximizes the use of digital technologies in all socio-economic activities in order to develop infrastructure, innovation, data, human capital, and other digital resources that will ultimately drive the country towards wealth, stability, and sustainability.

20-Year Thailand Digital Landscape

- 1 Policy
- 2 Challenges
- 3 Vision
- 4 Landscape
- 5 Goals
- 6 Strategies
- 7 Activities
